

# 3<sup>rd</sup> RNA-seq Workshop 2015

RWTH Aachen 25<sup>th</sup> to 27<sup>th</sup> of March

**Read Mapping**  
**Statistical Evaluation**  
**Enrichment Analyses**  
**Clustering Tools**  
**Biological Interpretation**

## HandsOn in ComputerLab

**Basics** Unix, Perl and R basics for complete beginners

**Read mapping** formatting reads, different mapping programs, parsing and testing results

**statistical evaluation** open source software to test for differential expression

**enrichment analyses** data preparation, Fishers exact test, multiple hypothesis testing correction

**clustering tools** principle component analyses, hierarchical clustering

**biological interpretation of data**

## Lectures (planned)

Mapping of mutants

Genome Assembly

RNA-seq of non-models

## Q&A session

Opportunity to discuss your own projects

The workshop fee is 50 Euro which is waived for those currently involved in a Plant Biotechnology (PLANT2030) or tri-national KBBE project through the Plant Biotechnology Primary database. To participate, send a letter of motivation of no more than 2000 characters stating how you (plan to) use NGS in your work and which sponsoring consortium you are a member of no later than 01.03.2015 to [m.bolger@fz-juelich.de](mailto:m.bolger@fz-juelich.de)

## Important Dates

01.03.15 Application Deadline

06.03.15 Notification of Participation

25.03.15 13:00 Start of Workshop

27.03.15 15:00 End of Workshop

More information can be obtained by writing to
