

## Abstracts

Freitag, 20.01.2017

Initiation of fat-induced changes in energy metabolism and insulin Resistance (*Elisa Álvarez Hernández et al., Düsseldorf*)

Metabolic flexibility and oxidative capacity independently predict insulin sensitivity in newly diagnosed patients with type 2 diabetes (*M. Apostolopoulou et al., Düsseldorf*)

Patterns of cutaneous nerve fibre loss and regeneration in type 2 diabetes with painful and painless polyneuropathy (*G. Bönhof et al., Düsseldorf*)

Triglyceride metabolism in liver is regulated by non-canonical action of TR-Beta (*G. S. Hoenes et al., Essen*)

Differential Patterns of Impaired Cardiorespiratory Fitness and Cardiac Autonomic Dysfunction in Recently Diagnosed Type 1 and Type 2 Diabetes (*M. Röhling et al., Düsseldorf*)

Enhanced CNS IL-6 Trans-Signaling in Obese Mice Sensitizes for IL-6-Dependent Improvement of Energy and Glucose homeostasis (*K. Timper et al., Köln*)

ApoA5 and ApoE Haplotypes Modify Associations of Serum Lipids with Dietary Patterns among Persons with Recently Diagnosed Type 2 Diabetes (*K. Weber et al., Düsseldorf*)

TR-AlphaDelta1 is not an inhibitor of nuclear TR-Alpha signaling (*M. Groeben et al., Essen*)

Treatment of AHDS with chemical or pharmacological chaperones (*D. Braun und U. Schweizer, Bonn*)

## Hinweis

*Bei der Angabe der Affiliation von Prof. Roden ist uns leider ein bedauerlicher Fehler unterlaufen. Die richtige Schreibweise lautet:*

**Prof. Dr. med. Univ. Michael Roden**

Klinik für Endokrinologie und Diabetologie,  
Universitätsklinikum Düsseldorf  
Institut für klinische Diabetologie,  
Deutsches Diabetes-Zentrum (DDZ) Düsseldorf  
Leibniz Center for Diabetes Research  
at Heinrich Heine University Düsseldorf

*Wir bitten, den Fehler zu entschuldigen!*
