

HLN-Kolloquium WS 2012/13

jeweils Montag ab 13:15 in NC 02/99

- 05.11.2012** **Dr. Alex Yanson**
Leiden University
Cathodic corrosion as a clean, simple and versatile method for electrochemical synthesis of nanoparticles
- 12.11.2012** **Dr. Frédéric Kanoufi**
ESPCI ParisTech-CNRS
Inspecting the local chemical transformation of surfaces by electrochemical and optical microscopies
- 19.11.2012** **Dr. Sven Koehler**
The University of Manchester
Laser-induced Dynamics: From the Gas-phase to Interfaces
- 26.11.2012** **Dr. Harun Tüysüz**
Max-Planck-Institut für Kohlenforschung, Mülheim
Ordered mesoporous materials in heterogeneous catalysis
- 10.12.2012** **“Weihnachstkolloquium”**
Dr. Roland Marschall
Ruhr-Universität Bochum
Mixed oxide semiconductor photocatalysts for solar energy conversion
Dr. Christian W. Müller
Ruhr-Universität Bochum
Single-Conformation Spectroscopy: Bridging the Complexity Gap between Gas and Solution Phase
- 14.01.2013** **Dr. Sven Hennig**
Chemical Genomics Centre, Dortmund
Alternative Approaches in Transcription Regulation - Modulating Complexes of Noncoding RNAs and Proteins

Mit freundlicher Unterstützung durch

RUHR-UNIVERSITÄT BOCHUM
Fakultät für Chemie und Biochemie
