

## Literaturverzeichnis

- [Din05] Seán Dineen. *Probability theory in finance*, volume 70 of *Graduate Studies in Mathematics*. American Mathematical Society, Providence, RI, 2005. A mathematical guide to the Black-Scholes formula.
- [EK99] Robert J. Elliott and P. Ekkehard Kopp. *Mathematics of financial markets*. Springer Finance. Springer-Verlag, New York, 1999.
- [Eth02] Alison Etheridge. *A course in financial calculus*. Cambridge University Press, Cambridge, 2002.
- [FS04] Hans Föllmer and Alexander Schied. *Stochastic finance*, volume 27 of *de Gruyter Studies in Mathematics*. Walter de Gruyter & Co., Berlin, extended edition, 2004. An introduction in discrete time.
- [KMM03] Pablo Koch Medina and Sandro Merino. *Mathematical finance and probability*. Birkhäuser Verlag, Basel, 2003. A discrete introduction.
- [LL96] Damien Lambertson and Bernard Lapeyre. *Introduction to stochastic calculus applied to finance*. Chapman & Hall, London, 1996. Translated from the 1991 French original by Nicolas Rabeau and François Mantion.
- [Ros99] Sheldon M. Ross. *An introduction to mathematical finance*. Cambridge University Press, Cambridge, 1999. Options and other topics.
- [Shr04a] Steven E. Shreve. *Stochastic calculus for finance. I*. Springer Finance. Springer-Verlag, New York, 2004. The binomial asset pricing model.
- [Shr04b] Steven E. Shreve. *Stochastic calculus for finance. II*. Springer Finance. Springer-Verlag, New York, 2004. Continuous-time models.
- [Ste01] J. Michael Steele. *Stochastic calculus and financial applications*, volume 45 of *Applications of Mathematics (New York)*. Springer-Verlag, New York, 2001.
