

# Reduction in the Philosophy of Mind

edited by  
Raphael van Riel and Albert Newen

## *philosophia naturalis*

Journal for the Philosophy of Nature  
(Eds.: A. Bartels, B.-O. Küppers, C. U. Moulines)

Under a certain interpretation the whole modern philosophy of mind can be conceived as being concerned with issues of reductionism or anti-reductionism – either by trying to free the community from its Cartesian heritage or by trying to reinstall it in modern terms. Consequently, the questions of (i) what reduction consists in and (ii) whether or not reductionism is true figured among the most prominent in the philosophy of mind and science.

### Contents

#### *Part I: Models of Reduction*

Causal Properties and Conservative Reduction

MICHAEL ESFELD

Conservative Reduction of Biology

CHRISTIAN SACHSE

Reductive Identities: An Empirical Fundamentalist Approach

DOUGLAS KUTACH

Non-Reductive Physicalism and the Teleo-Pragmatic Theory of Mind

ROBERT VAN GULICK

#### *Part II: Reduction, Phenomenality, and the Explanatory Link*

Replacing Functional Reduction with Mechanistic Explanation

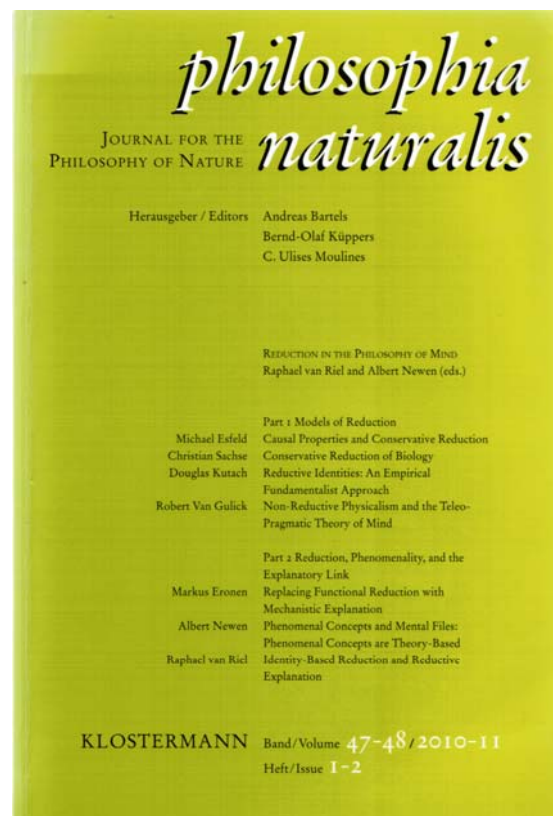

MARKUS ERONEN

Phenomenal Concepts and Mental Files: Phenomenal Concepts are Theory-Based

ALBERT NEWEN

Identity-Based Reduction and Reductive Explanation

RAPHAEL VAN RIEL

ISBN 978-3-465-04126-9

ISSN 0031-8027

Band/Volume 47-48/2010-11

Heft/Issue 1-2
