

FIRST ANNOUNCEMENT

International Symposium

"Genome-enabled approaches towards molecular functions in ecology and evolution"

of the DFG Priority Research Programme 1529 (www.adaptomics.de)

31 March to 3 April 2014
Bad Neuenahr, Germany

More information to follow soon.

Invited speakers

Maria Albani	Juliette de Meaux	Maud Tenaillon
Kirsten Bomblies	Tom Mitchell-Olds	Katja Tielbörger
Marcel Dicke	Caroline Müller	Xavier Vekemans
Kathleen Donohue	Magnus Nordborg	John Willis
Brandon S. Gaut	Ophélie Ronce	Andreas Weber
Beverley Glover	Laura Rose	Detlef Weigel
Saskia A. Hogenhout	Fabrice Roux	Alex Widmer
Frank Johannes	Outi Savolainen	Steven Wright
Sophie Karrenberg	Sheri Simmons	

Tentative Session titles

1. Mating, reproductive barriers and speciation
2. Genomic and epigenetic variation;
(slight change: was "Genome dynamics and epigenetics")
3. Population genetics and evolutionary ecology;
(slight change: was "Population dynamics and molecular evolution in an ecological context")
4. Functions of alleles underlying plant adaptations
5. Adaptation to abiotic factors and life history traits
6. Between-organism interactions (slight change: was "Inter-organism interactions")
