Module EELP IVb: Law

The Centre of Law (*Qualifikationszentrum Recht*) is responsible for the module Law:

<http://zrsweb.zrs.rub.de/qzr/>

The mandatory consultation meeting at the beginning of studies will determine whether students need to attend an introductory lecture course "Introduction to Public Law" (in German) or whether they will be able to attend two advanced courses without additional preparation. Students may only attend two advanced courses if they have obtained 30 CP in the fields of constitutional law and general administrative law in a previous program.

Students without prior knowledge of law are required to attend the lecture course: "Introduction to Public Law" which is taught in German. The course provides students with an introduction to constitutional and administrative law as well as European Community law. Students who do not speak German but have prior knowledge of law, can participate in the module EELP IVb Law. Those should have in mind that we can only offer 2-3 courses in Englisch through your whole studies.

The lecture "Introduction to Public Law" (in German) takes place every winter semester. Students without a background in law are required to pass a final exam in this lecture. If the lecturer of the second part of the module provides the possibility to pass a graded exam, the grade earned may also be the module grade.

Please contact Mr. Sebastian Mogk and Dr. Max Weber (qzr-jura@rub.de) at least four weeks before the start of the semester to check details for attending the specific courses in Law.

German version:

Die Betreuung dieses Moduls liegt beim Qualifikationszentrum Recht: <http://zrsweb.zrs.rub.de/qzr/>

Jeweils im **Wintersemester** wird eine Vorlesung "Grundlagen des Öffentlichen Rechts (für Nichtjuristen)" als erster Modulbestandteil für Studierende **ohne** juristische Vorkenntnisse angeboten. Die Vorlesung wird abgeschlossen mit einer Klausur. Studierende, die über juristische Vorkenntnisse (mind. 30 CP) aus einem Erststudium nachweisen, können im Modul EELP IVb: Law aus dem Angebot der unten stehenden fortgeschrittenen Kurse belegen.

Darüber hinaus ist als zweiter Modulbestandteil eine weiterführende Veranstaltung (Vorlesung oder Seminar) aus dem Öffentlichen Recht zu belegen. Die Studierenden sollen dabei möglichst diejenigen Veranstaltungen wählen, die dem thematischen Schwerpunkt ihres Studiengangs korrespondieren. Im zweiten Modul-

teil ist ein Kurzesessay zum Vorlesungs- bzw. Seminarstoff oder ein Sitzungsprotokoll anzufertigen. **Bitte beachten Sie: der zweite Modulteil kann grundsätzlich nicht vor dem ersten Modulteil absolviert werden!** Das Ergebnis der Klausur zur Veranstaltung „Grundlagen des Öffentlichen Rechts (für Nichtjuristen)“ kann, ebenso wie die Leistung des zweiten Modulteils (falls diese benotet worden ist) als (Gesamt-) Modulnote angerechnet werden.

Wichtig: Die Studierenden sollten sich spätestens 4 Wochen vor Semesterbeginn an Herrn Wiss. Mit. Sebastian Mogk und Herrn Dr. Max Weber (gzi-jura@rub.de) vom Qualifikationszentrum Recht wenden, damit mit den jeweiligen Dozenten die Frage der Teilnahme an der Veranstaltung geklärt werden kann.

Vorgegeben als erster Modulbestandteil für Studierende ohne juristische Vorkenntnisse.

Introduction to Normative Ethics (seminar in English)

2hrs, Tue 14.15-15.45

Room: GA 3/143

Credits: 4 or 6

Start: 08/10/2019

mandatory for 1st semester EELP students

Normative ethics is one of the oldest fields in philosophy. Prominent figures such as Aristotle, Hume, and Kant have written and developed distinctive positions in this field. Roughly said, normative ethics is a sub-field of practical philosophy attempting to answer the questions which motives, actions, rules of actions, character traits or even institutions are required or forbidden, and why. In this introductory course we shall explore and discuss the most prominent traditions, positions, and methods in normative ethics (e.g., virtue ethics, moral sentimentalism, Kantian ethics and consequentialism) as well as the main problems and complexities of normative ethics.

Migration, Stability and Solidarity (seminar in English)

2hrs, Wed 12.15-13.45

Start: 09/10/2019

recommended for 1st semester EELP students

In recent years, much of the philosophical literature surrounding immigration focused on the question whether borders should be open or closed by looking at a state's or immigrant's *rights*. However, little work has been done on the question which normative status the *social impact* of migration might have on these questions. This seminar will take a closer look at this aspect by examining two key political concepts and their relation to migration: stability and solidarity.

Leading questions will be: In which ways might migration affect stability and solidarity within societies? Which normative concepts are important when discussing these (possible) effects? Could concerns over stability and solidarity justify the exclusion of immigrants and if so, would such justifications work on a pragmatic or principled level? Or does the notion of solidarity imply to open borders? How could the normative analysis of these concepts inform our political reasoning, especially with regard to weighing the moral claims of citizens and immigrants? Finally, can specific rights and duties be developed from the concepts of stability and solidarity?

One common feature of today's debates in liberal societies is their growing moralization, e.g. with regard to migration or climate change. This means that political demands are justified by moral principles, which entails a rejection of opposing claims as principally wrong. Although a result of freedom of expression, it often is argued that this kind of public discourse has the potential to endanger social cohesion, peace and thereby liberal democracies themselves. By holding moral neutrality in high esteem, liberal societies are in need of political compromise to overcome these principled divisions. However, with its focus on justice and basic institutions, the traditional literature on political liberalism did not analyze the notion of political compromise in depth.

This seminar, therefore, will look at the recently growing body of literature on the concept of political compromise. It aims at elaborating if and how the idea of political compromise can be justified and how to differentiate between "good" and "bad" compromises. Moreover, it will be asked if and how a hierarchy of political values like peace, stability and justice should be applied to public issues. Could there be good reasons to forestall advancements in justice for the sake of long-term social peace and stability? If so, how can social progress and justice be aligned with the notion of political compromise? Finally, who are the agents of political compromise and are there rights, duties or political virtues connected to this essential political concept?

Climate change constitutes one of the most pressing problems and certainly the most intricate moral challenge of our time. But so far the industrialized countries have not even rudimentarily coped with this challenge. What ought to be done in such a situation? Due to a variety of reasons normative ethics has great difficulties to answer this question. Climate change is connected with many problems ethics is ill prepared to solve, such as the relation between individual and collective responsibility, questions of global justice, problems of our obligations to future generations, and the problems of adequately dealing with risks. We will deal with these problems in order to improve our ability to answer the question of what ought to be done in the face of climate change.

We will work with essays representing different and controversial viewpoints on the topics of the seminar. At the beginning of the seminar, these essays will be provided as a download.

Im Laufe der Veranstaltung wird zunächst erläutert, mit welchen Problemen sich das Fach Betriebswirtschaftslehre befasst. Betriebswirtschaftslehre wird verstanden als diejenige Verhaltenswissenschaft, die optimale Entscheidungen zur Einkommenserzielung und Risikosteuerung untersucht. Die Frage nach optimalen Entscheidungen betrifft dabei sowohl Probleme individuellen als auch kollektiven Verhaltens. Eine Reihe von betriebswirtschaftlichen Problemen betrifft nur den Entscheidungsträger selbst und kann daher ohne Berücksichtigung anderer Akteure analysiert werden (sog. Robinson Crusoe Ökonomie). Das wirtschaftliche Zusammenleben in modernen Gesellschaften ist jedoch durch hohe Arbeitsteilung gekennzeichnet. Daraus ergeben sich Probleme der Verhaltensabstimmung, die ebenfalls einer betriebswirtschaftlichen Analyse zugänglich sind. Im Blickpunkt der Veranstaltung stehen zwei zentrale Mechanismen der Verhaltensabstimmung, nämlich der Marktmechanismus und die Verhaltensabstimmung in Unternehmen. Zentra-

les Merkmal des Marktmechanismus ist die Gleichberechtigung der Tausch-partner, das Verhalten wird ausschließlich über die Tauschbedingungen („Preise“) gesteuert. Dem steht die Verhaltensabstimmung in Unternehmen gegenüber, die auf hierarchischen Weisungsbeziehungen beruht. In der Veranstaltung wird der Frage nachgegangen, unter welchen Bedingungen welche Art der marktlichen oder unternehmerischen Verhaltensabstimmung jeweils zweckmäßiger ist.

The heterogeneity of African economies is stressed and students are expected to focus their written work (i.e., the seminar paper) on particular countries, sectors, and issues. The course also emphasizes the importance of a detailed grasp of economic history as a basis for critically assessing generalized debates on the determinants of recent economic performance. Topics covered include, among others, human capital, geography and health, trade and foreign direct investment, HIV/AIDS, institutions and governance, ethnic and linguistic divisions, and conflicts

The module analyses from an economic perspective the origin of information and knowledge and the incentives which encourage their emergence. Topics include intellectual property (IP), IP protection (patents), IP design, cumulative research, licensing, knowledge sharing, open source software.

The first part of the module (6 weeks) we will cover the basic topics in lectures and tutorials. The aim of the exam, which marks the end of the first part of the module, is to make sure that students have the necessary skills to understand the scientific literature in this area.

The second part of the module is a block seminar at the end of the semester where students will present their paper in class. Applying their knowledge of theoretical models acquired during the first part of the module, the students are expected to critically assess the state of the academic literature and answer a precise research question on this topic.

Thus the module is a good exercise for research projects like the master's thesis.

recommended for EELP students with sound knowledge in Macroeconomics I and Macroeconomics II is strongly recommended; willingness to learn computer programming.

Binding registration at the first meeting

Students get a comprehensive introduction into the computer simulation method of agent based modeling. They will learn how to design, implement and analyze these models. The implementation will be done using specialized computer software.

Complexity economics is a modern school of thought that differs strongly from neoclassical economics. The economy is conceived as a complex adaptive system. Agents are typically not fully rational and there is no a priori assumption that equilibria exist.

Complexity economics is well suited to study innovation and societal transformation processes. Examples of such transformations are the sustainability transition and the effect of digitalization.

In order to analyze complex adaptive systems, agent-based computer models are used which have advantages over mathematical equilibrium model. Agent-based models are an extremely flexible research tool that can be applied to many different topics and for many purposes. We present examples of agent-based models and show how that can be used for theoretical and policy analyses.

recommended for EELP students with knowledge in macroeconomics and mathematics for economists

Students deepen their knowledge in modern macroeconomics and learn new modeling techniques. The module stimulates critical thinking and trains the skills required to solve and analyze formal models. Advanced mathematical techniques such as solving linear difference equations and differential equations will be used. There is also an introduction to computer programming.

This module is necessary for further studies of macroeconomics at an advanced level. It prepares students for PhD programs or work in research institutions.

This module covers advanced theoretical models in macroeconomics. The focus is on the mathematical treatment of dynamic phenomena such as economic growth, business cycle fluctuations or inflation. We analyze dynamic mathematical systems.

The strong emphasis on mathematical modeling techniques reflects the methodological requirements of the current research literature in macroeconomics. The research literature is not accessible without strong mathematical modeling skills.

The valuation of environmental goods and amenities is often complicated by the lack of market prices. This seminar will deal with distinct empirical methods to estimate the value of environmental goods and amenities. Methods to be covered include both market and non-market valuation methods, such as hedonic pricing, contingent valuation and revealed preference methods to elicit willingness-to-pay

Students acquire knowledge on empirical methods to estimate the value of environmental goods and amenities. Furthermore, they improve their ability to understand and assess scientific literature, learn to write a seminar paper and to present their work.

Multilateralism in Crisis? Challenges for Global and Regional Economic Governance (seminar in English)

2hrs, Thu 10.15-11.45

Room: GD E1/236

Start: 11/10/2019

Prerequisite for participating in the seminars of Prof. Dr. Schirm is the attendance at his basic lecture "Internationale Beziehungen" or sound knowledge in International Relations. Please, contact Marcus Reinecke.

Over the last decades, global and regional governance have been questioned on several grounds. The global financial crisis, the Eurozone crisis, emerging powers' aspirations, and Western anti-establishment voters produced the following important changes and challenges:

- (1) the shift of powers from Western to non-Western countries replacing the old North-South divide;
- (2) the defiance of US and European authority in multilateral organizations, and
- (3); 'the globalisation fatigue' manifested by the surge of anti-establishment movements' popularity, discontent with domestic politics and efforts to regain society's control over market forces.

For these reasons, questions regarding the challenges and future role of global and regional governance are more important than ever. The focus in this seminar will be on these three challenges encompassing various types of policy fields (e.g. trade, finance, security, development and environment).

Students will gain knowledge on theoretical backgrounds focussing on international power (neorealism) and institutions (institutionalism), domestic interests and ideas (liberalism and societal approach) in order to empirically investigate traditional and new actors' role and performance as well as the international, institutional, and domestic driving forces shaping success or failure of governance in a global or regional setting (Africa, Americas, Asia and Europe).

Key Controversies in European Integration (seminar in English)

2hrs, Thu 14.15-15.45

Room: GD E1/ 156

Start: 11/10/2018

Prerequisite for participating in the seminars of Prof. Dr. Schirm is the attendance at his basic lecture "Internationale Beziehungen" or sound knowledge in International Relations. Please, contact Marcus Reinecke.

For over a decade, the European Union (EU) is in a continuous crisis mode putting long-term prospects of European integration largely into question. This 'state of emergency' illustrates that integration can be a reversible process once its output turns negative and its support fades. Departing from classic debates on the driving forces of European integration, this seminar addresses current multiple key controversies. The euro crisis, Brexit, the migration/refugee crisis, the rise of populism and gradual dissolution of democracy in some member states are various examples which have fundamentally affected European integration. The purpose of this seminar is twofold. On the one hand, students are familiarised with main traditions of integration theory (neofunctionalism, liberal intergovernmentalism, postfunctionalism) as well as various International Relations (IR) theories (institutionalism, liberalism and the societal approach). Their basic assumptions, key drivers, similarities and differences as well as their contributions to the understanding of recent developments in EU integration are highlighted. On the other hand, students subsequently apply theoretical knowledge to empirical evidence through case study presentations in order to identify different ways in which the multiple key controversies in European integration can be examined.

Achievements

regular, active participation, in-time submission (text 1 – 3 => 3rd session/ text 4 – 6 => 4th session) of literature reports (one page summary for each of the listed texts), presentation with hand-out, PowerPoint-presentation and discussion questions; additionally exam: term paper

Social Innovation between Local Embeddedness and Regional/Global Impact (seminar in English)

4hrs, Wed 10.15-13.45 (introduction seminar 09/10/2019; four blocks of 4 hours on Thursdays follow)

Room: UFO 01/ 03

Start: 09/10/2019

Societies in Europe today are facing a number of complex and interrelated socio-economic challenges as high youth unemployment, migration or demographic change, to name but a few. Welfare systems in Europe have limited ability to address adequately these challenges, so that growing part of the population faces difficulties accessing social benefits. Traditional (technological / economic) innovations alone have proved inadequate to master the challenges outlined and to contribute to inclusive growth. Consequently, alternative solutions, new forms of cooperation and better use of social resources are needed.

In this context, social innovations, which increasingly arise across Europe and around the globe, present a promising prospect for providing sustainable solutions to the identified socio-economic challenges.

In the course of the seminar, the theoretical foundations of social innovation as well as its social and economic impact will be worked out and reflected, based on case studies. As a starting point, the concept of social innovation will be clarified and various approaches for analysing social innovation will be discussed. Social innovations arise in a specific local / regional context, are often organized in small groups and therefore have a limited impact. Against this background, the question will be explored: how, under what conditions and with the help of which mechanisms a bridge between the local embeddedness of individual social innovations (micro level) and the grand socio-economic challenges (macro level) can be established. In addition to the discussion of mechanisms of diffusion and scaling, the question of suitable business models will be worked out. In order to develop a better understanding for the latter, the method of the "Business Model Canvas" will be tested in practical application. In small groups, concrete social innovative ideas will be developed and transformed into business models taking into account the respective regional/ local context. Finally, the fundamental connection between social innovation, institutional and social change as well as possible scenarios of scaling will be discussed.

The seminar will be held in four blocks of 4 hours on Thursdays. Each block will begin with a theoretical input followed by interactive group work in which the knowledge gained will be practically applied. The concrete dates will be set at the beginning of the semester. In a fifth block, the seminar participants will present an individual social innovative idea, based on an existing case study or own idea. The date and the form of the presentation will be set at the introduction seminar. The seminar format requires a minimum number of 10 participants to be conducted.

This course provides an introduction to the EU's relations with Southeast Asia's most important regional organization ASEAN. The course will discuss main theoretical approaches in the areas of Interregionalism, International Relations and International Political Economy. Students will focus on the workings and objectives of the EU's foreign policy vis-à-vis Southeast Asia, main policy fields and relevant regional and external actors. At the end of the course students are expected to be able to critically discuss the role of the EU as an external facilitator of regional integration in Southeast Asia as well as EU multilateral action with regard to trade and foreign and security policy.

Politics of Finance and Innovation in the People's Republic of China (seminar in English)

"Money" is one of the key pillars of power in the People's Republic of China according to David Lampton's study "The Three Faces of Chinese Power. Might, Money, and Minds". Developing and reforming its financial sector has thus been a sensitive issue for China's leaders. While the Chinese leadership acknowledges the need to modernize and internationalize its banking, securities and insurance business China is still carefully avoiding losing control of this sector of the economy. Several rounds of political and regulatory reforms have thus created a unique set of institutions to govern China's financial sector. Big state-controlled banks still dominate an increasingly diverse sector which is disrupted by the rapid emergence of new internet- and technology-based companies offering financial services outside the traditional banking framework. These fintechs not only disrupt the existing business models and regulatory practices, but also turn China into a world leader in financial system innovation. Finally, fintechs challenge the way how academia perceives and analyses finance.

How do the politics of finance and innovation in China work? What are the political interests, ideas, and mechanisms behind these developments? Who are the economic and social forces driving China's financial innovation? And what are the global effects of China's emergence as a global player in finance and innovation?

Start: 08/10/2019

Parlamente gelten im Volksmund als „Legislative“ oder als gesetzgebende Institution. Moderne empirische Analysen von Parlamenten in parlamentarischen Demokratien heben demgegenüber hervor, dass diese Institutionen kaum mehr der Gesetzgebung als vielmehr dem ‚making and breaking [of] governments‘ (La-

ver) dienen. Vor diesen widersprüchlichen Sichtweisen beleuchtet das Seminar die Ausübung der Gesetzgebungsfunktion durch Parlamente. Im Mittelpunkt stehen moderne empirische Analysen in der Rational Choice Perspektive, welche die policy- und ämterorientierten Ziele von Abgeordneten als Ausgangspunkte der Erklärung ihres politischen Verhaltens nehmen. Wesentliche Inhalte des Seminars sind: die Gestaltung der Gesetzgebungsagenda im Parlament, die Bedeutung von Abgeordneten, Fraktionen und Ausschüssen in der Gesetzgebung, sowie die Nutzung von Rederechten im Plenum. Einige der Analysen befassen sich mit dem Deutschen Bundestag, andere betrachten Parlamente in anderen Ländern, wieder andere nutzen den internationalen Vergleich als Untersuchungsinstrument. Ferner lernen die Studierenden einige wichtige Datenquellen und Datensätze zur Analyse von Parlamenten kennen.

Arenen der politischen Interessenvermittlung (Seminar in German)

2hrs, Thu, 14.14-15.45

Room: GD E2/236

Start: 17/10/2019

Interessengruppen wie Industrieverbände, Arbeitgebervereinigungen, Gewerkschaften und Nichtregierungsorganisationen, aber auch große Konzerne, Public Affairs Agenturen und soziale Bewegungen nutzen Regierung, Parlament, Medien und das Rechtssystem als Arenen, um ihre Interessen auf die politische Agenda zu bringen und politische Entscheidungen zu ihren Gunsten zu beeinflussen. Dieses Seminar untersucht die politische Interessenvermittlung in der Arbeitsmarkt- und Umweltpolitik auf bundesdeutscher und europäischer Ebene. Dazu werden zunächst die rechtlichen und theoretischen Grundlagen sowie Strukturen und Strategien der Interessenvermittlung behandelt. Anschließend wird in dem Seminar die Interessenvermittlung bei je drei Themen der Arbeitsmarkt- und der Umweltpolitik untersucht. Im Rahmen der Arbeitsmarktpolitik werden die Konjunkturprogramme während der Weltwirtschaftskrise 2008/09, die Einführung eines allgemeinen gesetzlichen Mindestlohns zu Jahresbeginn 2015 und die zuletzt im Mai 2019 überarbeitete EU-Entsenderichtlinie betrachtet. In der Umweltpolitik werden die Strategien von RWE und der Umweltbewegung in dem Konflikt um den Hambacher Forst, das Vorgehen von Automobilindustrie, Verbraucherschutzverbänden und der Deutschen Umwelthilfe beim „Abgasskandal“ sowie Ursprünge und Auswirkungen der Fridays for Future-Bewegung untersucht. Ziel des Seminars ist es, Interessenvermittlung im nationalen und Mehrebenenvergleich zu analysieren, sowie Kanäle, Strategien und Einfluss verschiedener Interessen und Akteure zu identifizieren. Der Vergleich der Interessenvermittlung auf zwei Ebenen und in zwei Politikfelder zeigt, wie institutionelle Rahmenbedingungen, Akteurs- und Interessenkonstellationen zu politikfeldspezifischen Ausprägungen der Interessenvermittlung führen und wie sich diese auf die Gestaltung von Policies auswirken.

Stand und Perspektiven der Energiewende in Deutschland (seminar in German)

2hrs, Tue 16.15-17.45

Room: GD E12/236

Start: 08/10/2019

Die Energiewende als gesellschaftliches Großprojekt steht seit 2011 in einer Reihe groß angelegter Reformvorhaben in Deutschland. Die Umsetzung der Energiewende erfolgt in einer Mehrebenenstruktur von der europäischen bis zur lokalen Ebene. Während der Implementationsphase sind eine aktive Koordination und Steuerung wesentliche Bedingungen zur Umsetzung der Energiewende. In dem Seminar sollen die politisch-administrativen Aspekte der Umsetzung auf der Bundes- und Landesebene sowie in den Kommunen untersucht werden. Nach einer theoretischen Einführung wird die Umsetzung der Energiewende anhand von Fallbeispielen näher betrachtet.
