

Workshop

History of the Life Sciences in Global Perspective Models of Gene Regulation in Postwar Period

3rd RUB-Workshop

History and Philosophy of the Life Sciences

Tuesday, 7. May 2013, 15:00-18:00

Building FNO 02/11

Research Colloquium

Edna María Suárez Díaz

*Universidad Nacional Autónoma de México
(UNAM)*

Edna Suárez Díaz is Professor for the History of Biology and the Philosophy of Technology at the School of Sciences at UNAM. She has published on the history of molecular evolution, the construction of objectivity in molecular phylogenetics, and the philosophy of experimental traditions. She is head of two current research projects: „Internationalization and standardization of the life sciences after World War II“, and „Genes and atoms in Mexico during the Cold War era“.

Organizer: Mercator Research Group »Spaces of Anthropological Knowledge« & Institute for Philosophy I (Christina Brandt and Jan Baedke)
