Message from the Guest Editors

Cerebrospinal fluid (CSF) is in direct contact with the brain and extends into the spinal cord. The main functions of CSF are to provide physical stability for the central nervous system (CNS), to actively regulate the CNS by supplying hormones and neuropeptides to it, and to remove various CNS metabolites. Due to its direct contact with the CNS, CSF is of great diagnostic importance. Thus, it can serve as a representative for the state of health of the CNS and provide important information on neurological diseases and disorders, which include for instance dementias (e.g. Alzheimer disease and Parkinson's disease), cerebrovascular diseases (e.g. stroke), neurotraum (e.g. spinal cord injury and traumatic brain injury), multiple sclerosis, neuroinfections and brain tumors.

In this Special Issue, we welcome contributions that provide an update on a wide range of topics in CSF diagnostics (e.g. milestones in CSF analysis or the current diagnostic standards). However, this issue also focuses on new and innovative approaches that are important for CSF-based diagnostics.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access:—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: Indexed in the [Science Citation Index Expanded](#) (SCIE - Web of Science), [Scopus](#), [EMBASE](#) (Elsevier) and [Chemical Abstracts](#) (CAS). Citations available in [PubMed](#), full-text archived in [PubMed Central](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 13.4 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2020).
