

GASTVORTRAG

Prof. Tomasz Skura

What is a Refutation System?

Thursday | July 12th, 2012

16.00 - 18.00 GA 04/187

Wir laden alle Interessierten herzlich zu diesem Vortrag ein.

Prof. Skura is Associate Professor at the Institute of Philosophy at the University Zielona Góra (Poland). His research concerns the syntactic method of refuting, whose essence is the overthrow of the sentence by deriving from it false consequences. He is interested in the refutation rules in non-classical logics (especially modal, intuitionistic and paraconsistent) and managed to get some new and interesting results, which are published in international journals and presented on important international conferences.

Prof. Tomasz Skura is hosted by Prof. Heinrich Wansing at the Institute of Philosophy II, Ruhr-University Bochum.
